OF EMERGENCY SERVICES

# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

## **Weather of Concern**

- A storm system will bring precipitation to much of Northern California tonight through Monday night. A few showers may linger over the mountain areas Tuesday as the storm exits into the great basin. Expect cooler than average temperatures for much of this week.
- Flash Flood Watch from 1000 hours Monday morning to 2100 hours Monday evening for areas in Amador, Calaveras, Colusa, Lake, Solano, and Yolo Counties.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA**

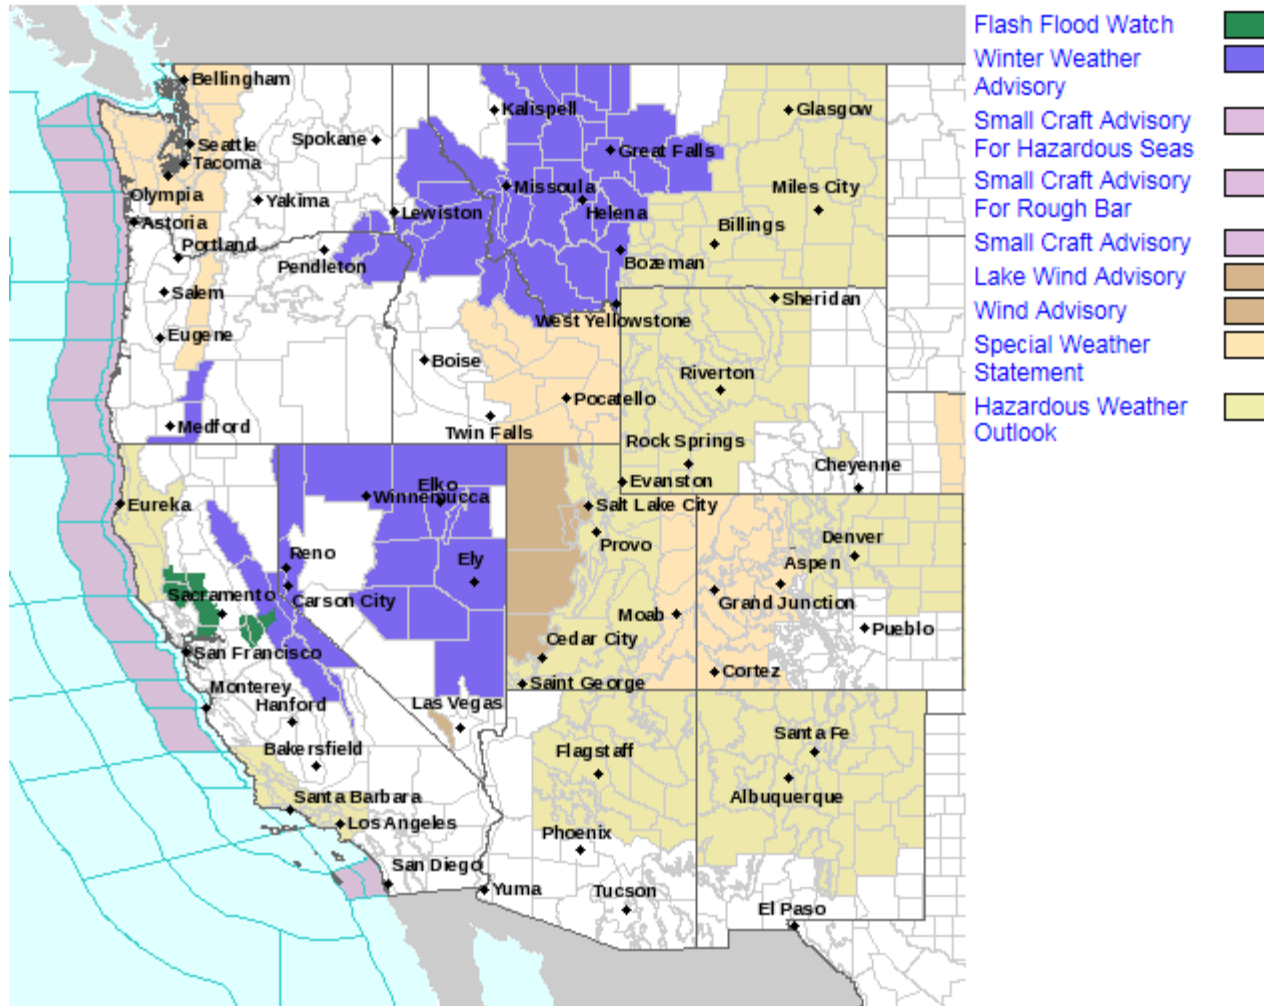

First wave of precipitation continues to spread through the valley. Models look similar to yesterday's for today's rainfall amounts. Models indicate this first wave will enhance over Sacramento this afternoon before ending late in the afternoon. Behind the front showers will likely develop to its north and west. In general amounts for the valley with this first wave look to be around a quarter of an inch or less with amounts in the mountains between a half an inch and three quarters of an inch. On Monday another wave will move in and will likely bring numerous showers to the interior during the day with additional rainfall and snowfall. There is also the potential for thunderstorms to develop late tonight and Monday over all areas so local areas could see higher amounts. The best time period and area for convection looks to be from late morning through early evening on Monday and from the Central Sacramento valley southward including the surrounding foothills. Snow levels will continue to lower this evening as colder air arrives throughout the night with the coldest air expected late tonight and Monday morning. Snow levels will be dropping to around 3500 to 4000 feet. Snowfall amounts look to be between 4 to 7 inches below pass levels down to around 5000 feet with up to 10 inches over the higher elevations through tonight.

### **SOUTHERN CALIFORNIA**

Scattered showers will start over the far northern parts of Central California late this afternoon and then spread southward into Southern California by Monday morning as a Pacific trough moves down the West Coast. Showers will end across most of the region by early Tuesday morning, but isolated showers will continue over the mountains through Tuesday afternoon. For the most part, Central California will receive between 0.25 and 0.50 inch of rainfall while most of Southern California is expected to receive less than 0.25 inch. It still looks as though the Sierra and its surrounding foothills will get between 0.50 and 1 inch of rainfall. The snow level will initially start around 7,000 feet and then drop to around 5,000 feet by Monday evening. This trough will also bring south to west winds of 20 to 30 mph with gusts to 50 mph to the mountain ridges and desert passes tonight through Monday night. North winds of 20 to 30 mph with gusts to 50 mph will surface across the south coast of Santa Barbara and the Grapevine on the back side of the trough Tuesday morning through Tuesday night. Temperatures will cool a couple degrees today and then significant cooling will take place Monday and Tuesday as the trough moves through. Maximum temperatures will be in the mid 50s to mid 60s across the mountains with upper 60s and 70s in the valleys today and then temperatures will drop into the 40s to low 50s across the mountains and upper 50s and 60s in the valleys Monday and Tuesday. Minimum humidity will continue to be between 12% and 25% away from the Central Valley and surrounding foothills today and then increase to above 40% Monday and Tuesday. A ridge of high pressure will build into California from the Pacific bringing a warming trend and low humidity to most of the region Wednesday through Saturday. Northeast to east winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California Thursday night through Friday afternoon.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.
